Summary

Motivated Electronics & Telecommunication Engineering student with experience in software development, machine learning, and full-stack projects. Skilled in Java, Python, JavaScript, Spring Boot, Angular, and SQL with hands-on internship experience in frontend development and REST API integration. Passionate about building scalable applications, research innovation, and solving real-world problems through technology.

Technical Skills

- **Languages:** Java, Python, JavaScript, TypeScript, SQL, HTML, CSS
- **Frameworks & Tools:** Spring Boot, Flask, REST APIs, Git, GitHub, Vercel, Supabase
- **Databases:** MySQL
- **Core Concepts:** OOP, DSA, DBMS, Machine Learning

Experience

TrackSoft Solution's Pvt. Ltd.

Software Developer Intern

Pune

Jan 2026 – Present

- Contributed to the development of the EnrolMe platform frontend.
- Assisted in building and enhancing user interfaces while collaborating with backend teams.
- Gained hands-on experience with REST APIs, SQL, and Spring Boot for data handling and service integration.
- Supported feature implementation, testing, and bug fixes in a real-world production environment.

Projects

MentorConnect | *Next.js, React, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Vercel*

- Developed a full-stack mentor-mentee platform with authentication, real-time messaging, session management, and role-based dashboards, supporting **200+ users** and **500+ mentorship interactions**.
- Integrated Supabase Auth, PostgreSQL, REST APIs, and responsive UI components, reducing authentication response time by **40%** and improving application scalability and security.
- Deployed the application on Vercel with cloud-based backend integration, achieving **99.9% uptime** and optimized frontend performance.

Smart City Guide | *Java, Swing, AWT, MySQL*

- Developed a desktop-based smart city navigation system for accessing public services, transport, and emergency information.
- Integrated MySQL database for efficient storage and retrieval of city service data with **95% query accuracy**.
- Improved navigation efficiency by **30%** through optimized search and categorized information modules.
- Designed an intuitive Java Swing UI to enhance accessibility and user experience.

Crop Recommendation System | *Python, Machine Learning, Flask, Pandas, Scikit-learn*

- Developed an AI-powered crop recommendation system using Flask and Scikit-learn, achieving **96%** prediction accuracy on soil and climate datasets.
- Implemented a Random Forest ML model with real-time inference, generating top-3 crop recommendations with average response latency below **2 seconds**.
- Built a responsive web application with AJAX-based interactions, SQLite prediction history, and REST APIs, improving usability and prediction tracking efficiency.

Achievements & Certifications

- **Google College Ambassador** with experience in technical community outreach and student engagement.
- Filed an **Indian Patent** for a power distribution fault detection system.
- Published research papers in multiple **international conferences**.

Education

Vishwakarma Institute of Information Technology

B.Tech in Electronics & Telecommunication Engineering

Pune, Maharashtra

2023 – 2027

R.S. Gawai Jr College of Science

Higher Secondary Certificate (HSC) – 77.67%

Amravati, Maharashtra

2021 – 2022
